Professional Summary

I am a keen learner, detail-oriented, organized, and motivated student completing my Diploma in Information Technology in the year 2025. Experienced creating Full-Stack Web Applications. Supports team communication, project coordination, design, and programming needs. Fluent in English. School projects included building web and mobile apps, optimizing programs and validating code to prevent vulnerabilities in applications. I am also an enthusiastic team player ready to contribute to company success.

WORK EXPERIENCE

IT Specialist

Octopus8 | September 2022 - October 2022

Gather user requirements from client meetings and create swim lanes for clients. Offer enterprise solutions like CMS, CRM, DMS, VMS etc. for SMEs, Non-Profit Organizations and Religious Organizations. Responded to support requests from end-users and patiently walked individuals through basic troubleshooting tasks. Gather data from clients and proceed with data cleaning for data migration into the system. Used WordPress to configure and maintain the software provided to the clients.

Internship - Software and Business Development Intern

Octopus8 | September 2021 - December 2021

On the business side, I made cold calls and emailing clients to let them know of the enterprise solutions that Octopus8 has to offer. This improved my communication skills when talking to potential clients. I also did photoshop and video editing for products that are sold at Octopus8.
On the software side, I did data migration and data cleaning for clients to have a smooth data migration process for our Clients. Including the creation and maintenance of WordPress Sites that I created and updated for their new and existing products.

Modules taken during course of study

- Fundamentals of Computing (Yr1, Sem1)

- Front-end Web Development (Yr1, Sem1)

- Fundamentals of Programming (Yr1, Sem1)

- Design for User Interaction (Yr1, Sem2)

- Back-end Web Development (Yr1, Sem2)

- Mobile Application Development (Yr1, Sem2)
